

The High-Torque Specialists

Leading Provider of Oilfield Rental Equipment and Services

A reputation for quality

Thomas Tools—a leading provider of drilling, completion, and workover rental tools and tubulars—has earned its reputation for quality, exceptional customer service, and expertise. Our downhole and surface equipment is built according to the strictest quality inspection and maintenance procedures in the industry.

Continued innovation resulted in the “Thomas Tools Feature,” which increases the torsional strength of high-torque connections. We were also instrumental in helping develop the first high-torque, double-shoulder refacing tools.

A commitment to excellence

As a result of our ongoing commitment to technical excellence, quality assurance, operational efficiency, and adherence to strict materials specifications, Thomas Tools is a proven leader in providing oilfield rental equipment and services for the oil and gas industry.

A history of innovation

Founded in 1961, the company has emerged from its beginnings as a downhole specialty tool provider to become today's high-torque specialists and innovators of downhole tools. Thomas Tools was directly involved in developing the first high-torque drillpipe in the United States.

Technicians in Thomas Tools bays visually monitor BOPs as they are high-pressure tested.

Thomas Tools provides premium quality oilfield equipment and a full range of services to meet your requirements.

Tubular Rentals for a Range of Operations

At Thomas Tools, we offer an extensive range of high-quality tubulars for operations across the country, from the Permian basin, the Haynesville, Eagle Ford and Bakken shales, and the Gulf of Mexico. We continuously review our existing inventory to address the ever-changing and rigorous demands of the oil and gas industry.

High-torque drillpipe

- Premium API and high-torque drillpipe (2 $\frac{3}{8}$ - to 6 $\frac{3}{8}$ -in OD)
- Landing strings (rated > 2,500,000 lbm) for enabling and expediting lifting extremely long, heavy casing strings in deepwater wells
- Hevi-Wate* transition drillpipe—62 types of drillpipe in ranges 2 (31-ft long) and 3 (42 $\frac{1}{2}$ -ft long)
- Drill collars

Tubing

- Premium tubing (1- to 4 $\frac{1}{2}$ -in OD, grades N-80, T-95, P-110, QT-125, and S-135).

BOPs

- ODs ranging from 2 $\frac{3}{8}$ to 29 $\frac{1}{2}$ in (working pressures from 500 to 15,000 psi)

Oilfield Equipment Catalog

High-pressure BOPs and other surface and downhole equipment is available for conventional applications. Rental equipment packages are also available for coiled tubing and snubbing-related services.

- Hevi-Wate transitional drillpipe and Spiral-Wate™ drillpipe in sizes ranging from 2 7/8 in to 6 5/8 in
- Drill collars in sizes from 2 1/4-in to 9 1/2-in OD
- Certified high-pressure, critical service BOPs from 2 5/8-in to 29 1/2-in OD (working pressures from 5,000 to 15,000 psi)
- Flow iron packages
- High-pressure manifolds
- Spacer spools to raise or space apart BOPs or connect a choke manifold to the well control system
- Handling tools
- Crossover subs
- Specialized downhole tools
- Downhole accessories and surface products
- Coiled tubing support and snubbing surface equipment, including
 - snubbing BOPs
 - hydraulic and manual squeeze and pump manifolds
 - gas busters, tanks, and blenders
 - dual-pod filtration units
 - flow equipment
 - nitrogen bottle racks
 - spools and adapters

One of Thomas Tools' tallest snubbing stacks is shown—a rig-up of 21 1/4-in BOPs

Various sizes, weights, and grades are available for almost any slimhole or standard bottleneck drillpipe application.

Full Range of Services

We provide our customers with premium oilfield equipment and a full range of services—from maintenance and cleaning to testing and repair—from nine strategically located centers throughout the United States.

- Multiple, high-pressure testing bays with simultaneous testing capabilities and
 - video surveillance of testing
 - hydrostatic pressure testing from 0 to 30,000 psi
 - hydraulic pressure testing from 0 to 5,000 psi
 - fully enclosed environment and quick nipple-up unit
- Accumulator systems
- Bottomhole assembly bays

The Thomas Tools Advantage

Experienced personnel

The skill level of personnel at Thomas Tools provides a competitive advantage. Many of our shop workers, field technicians, and management personnel have 30 or more years of industry experience.

Global customer service

Our highly-skilled field personnel are on call—24 hours a day, 7 days a week, 365 days a year—to provide the service you need for all of your downhole service requirements.

Quality standards

Our equipment, which is purchased only from world-class vendors, is thoroughly inspected to ensure the highest standards of quality and reliability. Our inspection procedures are widely recognized as some of the most stringent in the industry.
