**GENERAL LETTER GL19 142 R2
Withdrawal of the NuFlo Orifice Meter**

Due to competitive pressure, Cameron has withdrawn the NuFlo (formerly North Star) Single and Dual chamber orifice fittings and all meter run assemblies from all markets.

All maintenance parts will remain available for the foreseeable future including orifice plate carrier parts and the body O-ring used in all models. All dual chamber internal parts including redress overhaul kits, individual parts and bypass balls also remain available. Supply opportunities outside this scope including bodies, Cameron overhaul services and new assemblies must be declined.

Cameron continues to offer the Clif Mock single chamber fittings to the USA market.

Cameron thanks our loyal customers who appreciated the NuFlo design and apologizes for any inconvenience that may result from this business decision.

Yours truly,
Cameron, a Schlumberger company
