WKM Valves—Triple Offset Valves

High-quality, bidirectional valves for critical applications in demanding markets
WKM Valves—Triple Offset Valves

The TOV completes our reliable, performance-proven, quarter-turn butterfly valve portfolio. The true triple offset geometry of this valve allows for bubble-tight sealing to create a valve that delivers fully bidirectional zero-leakage shutoff per API Standard 598.

Backed by our world-class engineering, manufacturing, and sourcing expertise, the TOV provides a trusted solution ideal for crucial applications. Operators around the world rely on our dedication to high-quality standards, competitive manufacturing processes, and world-class support for total valve life cycle support.

Advantages
- True triple offset geometry
- Fully bidirectional zero-leakage shutoff per API 598
- Field-replaceable metal seat
- Life cycle tested as a bubble-tight bidirectional valve
- Standard bearing seals
- Self-centering disc
- Available in a wide range of configurations: lug and short (ISO) and long pattern
- Carbon and stainless steel standard; other materials on request

Triple Offset Geometry

Offset 1 provides full 360° uninterrupted sealing.

Offset 2 provides eccentric rotation of the disc that swings the seal ring completely off the seat upon opening.

Offset 3 moves the centerline of the cone rotation laterally from the centerline of the disc rotation, enabling the cone to seal without rubbing.

Compliance and Specifications

Major Markets

Power and steam
- District heating
- Bitumen

Petrochemicals (refining and chemicals)
- Coking
- Reformers — cracking
- Tank switching
- Ethylene
- Butadiene
- Isocyanates — plastics

Midstream
- Tank and terminal
- Tank switching
- Long pattern for gate valve replacement
- Storage for all types of hydrocarbons and chemicals
- Liquid transfer

Upstream production
- Process equipment
- Separation — molecular sieve
- Switching
- Floating production platforms
- Manifolds
- Slurry, oil sands, and SAGD methods
- Secondary recovery

Applications

Oil and gas
- Critical isolation
- Steam piping and condensate
- Offshore platforms
- Cooling water systems
- Seawater
- Produced fluids processing systems

Refining and petrochemical processing
- Hydrocarbon processing
- Hydrogen
- Oxygen
- Thermal fluids
- Hot gases
- Sulfur (tail gas)

Midstream
- Tank isolation
- Manifold system isolation
- Metering systems
- SCADA systems

Liquefied natural gas
- LNG storage
- LNG production

Power and district heating
- Steam isolation
- Hot water control systems
- Geothermal steam

Flange Connections

Lug pattern per API 609
Short pattern per ISO 5752/API 609
Long pattern per ASME B16.10 and API 609
